Touch keypad to manage intrusion detection system

ANIMA is the new series of EL.MO. **capacitive touch keypads** that with a simple touch are able to **manage** your intrusion detection system.

Their glossy and uniform design lights up **by approaching** your hand to the surface: the keypad will appear and it will be immediately ready to use.

ANIMA series offers an **ease of use** and an unique and essential design.

Thanks to the high technological level, ANIMA is the best EL.MO. keypads

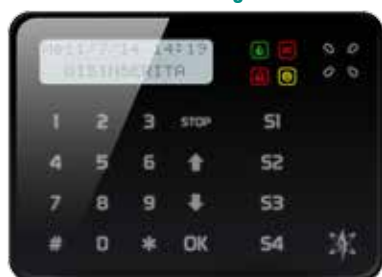

series in their market segment.

The result of experience and study of our R&D team can boast many strengths: it is able to arm/disarm and divide in 4 sectors the intrusion detection system with a proximity key, to set the stand-by backlight mode and to **customize the menu**.

In addition, the keypads are suitable for **flush mounting installation**, made more elegant with a shiny frame.

Customization of the stand-by backlight mode:

Soffused light

Partially OFF

Totally OFF

Surface mounting

Flush mounting

Minimal design

» ANIMA is an elegant and slim keypads series that in stand-by offers a **shiny and uniform surface**: by approaching the display will be activated.

Touch Pad Cap Sense

» It is possible interact with the control units through a **simple touch on the surface**.

Customizable menu

» The management menu is very **easy, intuitive and customizable**. In this way it is possible interact with the control unit quickly.

Built-in proximity key reader

» The ANIMA series is equipped with a **built-in proximity key reader** for easy arming and disarming of the intrusion detection system.

Flush mount

» With the ANIMABOX and ANIMABOXB optional kits, the ANIMA keypads are suitable for **flush mounting installation**, made more elegant with a shiny frame.

4 sectors

» It is possible divide the intrusion detection system in **4 sectors** thanks to specific buttons.

Customizable backlight

» You can set the stand-by backlight mode: soffused light, partially OFF or totally OFF. In the operative mode, it will be totally ON.

Tamper protection

» The **tamper protection** against opening and removal guarantees a high security level.

Technical features

Model	ANIMA	ANIMAB
	 OCTAS0101600  OCTAS0101601	 OCTAS0102000  OCTAS0102001
Function		
Colour	Black	White
Type	Touch Pad Cap Sense keypad for the intrusion detection system managed by VIDOMO, NET, ETR, PREGIO2000, TITANIA and ET4 control units	
Commands	Keypad with 20 capacitive keys divided in two groups. There is a key for the access to the menu	
Viewings	Systems LED, messages in the display, backlit keys	
Terminals	RS485 serial line, I66 inserter, open-collector 30mA output	
Protection	Tamper protection against opening and removal	
General features		
Operative temperature	-10°C / +40°C, 93% U.R.	
Protection class	IP3X	
Dimensions and weight	W 134 x H 95 x D 10 mm - 159g	
Power consumption DC12V	55 mA with display totally OFF, 90 mA with connected control unit, 110 mA max	
Power supply	DC12V (7 - 15V) supplied by the control unit	
Certifications	Certified IMQ-Allarme EN50131-3:2009 grade 2-3 (according to the system where it is installed in) environmental class II, EN50131-6:2008	
Parts supplied	Technical manual, screws and dowels for fixing, 680 Ohm resistor, cable with JST connector for the inserter	
Optional accessories	Kit for flush-mount (box + frame) black colour mod. ANIMABOX or white colour mod. ANIMABOXB	

Optional accessories

For the flush-mount of the keypads, the ANIMABOX (for ANIMA) and ANIMABOXB (for ANIMAB) optional kit are available.
