SIEMENS

SPCanywhere: Mobile application for SPC

SPCanywhere V1.1 is optimized for iPhone 5 and works with iPad 2, iPad, iPhone 4, iPhone 3GS with iOS 5.

The attractive and easy to use application provides the user with a powerful interface to control their SPC intrusion system anywhere and anytime.

It enables you to view and control your SPC intrusion system installed at your premises. A graphical map with the option of adding multiple layers visualizes the installation and let you quickly see the status of your premises. SPCanywhere allows you to set or unset your SPC intrusion system, open doors, control outputs, check the status of all of the zones (detectors) of your system and also to get a live view into the supervised premises by accessing the IP cameras connected to SPC.

SPCanywhere V1.1 is available in the following languages:

- German
- French
- Italian
- Spanish
- Swedish
- Dutch
- Danish

The language is selected automatically according to the language chosen for the mobile device.

An FAQ is available embedded in the app, which explains the most common questions regarding the use and configuration of the app.
